

Why we should say **NO** to nuclear power

By **Ian Lowe**

CONTENTS

Introduction	2
1. Because it is not a fast enough response to climate change	9
2. Because it is too expensive	15
3. Because the need for baseload electricity is exaggerated	23
4. Because the problem of waste remains unresolved	27
5. Because it will increase the risk of nuclear war	33
6. Because there are safety concerns	41
7. Because there are better alternatives	47
Rebuttal by Barry W. Brook	51

Why we should say **YES** to nuclear power

By **Barry W. Brook**

CONTENTS

Introduction	2
1. Because renewable energy & energy efficiency won't solve the energy & climate crises	5
2. Because nuclear fuel is virtually unlimited & packs a huge energy punch	13
3. Because new technology solves the "nuclear waste" problem	19
4. Because nuclear power is the safest energy option	25
5. Because advanced nuclear power will strengthen global security	31
6. Because nuclear power's true costs are lower than either fossil fuels or renewables	37
7. Because nuclear power can lead the "clean energy" revolution	45
Rebuttal by Ian Lowe	51
